

Streamable Finance offers asset streaming capabilities wrapped in financial and banking infrastructure. First ever Web2 and Web3-combined streaming suite disrupting on-demand-pay, salary, billing, housing and lending industries simultaneously with a 1T+ USD addressable market opportunity.

Real Time Cash Balance

Addressable markets

Problems

- 1 Delayed access to earned income.
- 2 Overspending or Expensive subscriptions.
- 3 High working capital requirements for businesses and supply chains.
- 4 Poor visibility of financial flows.

Products

- a) Streamable Payments by the second.
- b) Streamable banking infrastructure.
- c) Fully fledged DEX.
- d) Streamable investments.

Solutions

 <p>Getting paid by the second (Pay-onDemand), no more waiting for paydays</p>	 <p>Works without working capital or waiting for payments</p>	 <p>Maximise capital efficiency (i. e. redirect "spare" capacity to an investment pool)</p>	 <p>Reinventing funding, credit and borrowing with new rules on the go</p>
 <p>Visualise your real-time cash flow and available balance</p>	 <p>No more recurring payments and deadlines</p>	 <p>Pay for memberships, rent, leasing and any pay-per-use</p>	 <p>Streams assets, property rights, royalties and even mortgages</p>

Our Edge

1. Utilising an existing ecosystem of products and users accross Europe.
2. Offering first ever 1-1 backed eletronically streamable fiat.
3. Competition does not cater Web2 + Web3 at once and does not have regulatory compliance to do so.
4. Full pre-existing suite of Fintech and regulatory compliance infrastructure taking years and millions of USD to build.
